

XanEdu™

CoursePack Development Services

What is XanEdu?

XanEdu, a division of ProQuest Information and Learning, is your link to custom publishing—**print, online, or combination**. Our name comes from the Chinese word Xanadu, which means “Utopia.” And we are “Utopia for the Mind,” because XanEdu has amassed one of the largest commercial and scholarly archives of journals, periodicals, newspapers, out-of-print books, cases and academic collections—second only to the Library of Congress. Our digital content is already copyright-cleared, which means it can be used in courses immediately—no waiting for permissions! And XanEdu’s copyright clearance services offer a streamlined solution for clearing content not currently found in XanEdu’s extensive collections.

What types of services does XanEdu offer?

We’ve expanded our faculty services dramatically, offering you both easy-to-use online tools and direct access to our editorial staff providing you a full turn-key solution for CoursePacks.

-  **Print CoursePacks with a Plus:** Comprehensive service plus the **option** to add a module of the XanEdu™ ReSearch Engines, updated daily, keeping your course current.
-  **Full Editorial Services:** Create your CoursePack yourself or send us your bibliography, and we’ll build a CoursePack for you.
-  **Expert Help:** We’ll help you search our database and suggest relevant resources so you can make optimum content selections.
-  **Copyright-Clearance Service:** We’ll handle permissions for the material not already copyright-cleared. Please allow extra time for this option.

How much does it cost to use XanEdu?

It is just like a textbook adoption model—the faculty member chooses the course material, and the students pay for it. On average, XanEdu CoursePacks costs \$25.00.

How do students access a digital XanEdu CoursePack?

After you create your CoursePack, students go to your specific CoursePack URL, complete a one-time/one-Pack e-commerce transaction, and they have unlimited access to the pack for 6 months. They can also print from the screen or purchase CoursePacks through their bookstore.

Does this work with Blackboard or other eLearning platforms?

Yes. For Blackboard, please visit <http://www.xanedu.com/addlist/blackboard.shtml> or call/ email for assistance with other platforms. The XanEdu CoursePacks can of course also be used in regular face-to-face classes.

How can faculty get access?

Go to www.xanedu.com and click the FACULTY button next to ‘New to XanEdu?’ in the upper right hand corner. You can also email your complete contact information to Mona.
